## Experience

### Asurint - Software Engineer (UI/Front End)

Dec 2019 – Present

- Collaborate with Business Analysts to create wireframes for new UI
- Develop new UI or revise existing UI using best UX/UI practices
- Work with designer to create new UI look and feel
- Develop design system for consistent and repeatable UI creation across all development teams
- Build shared library of UI components for development team using HTML, CSS and React

### dreambook.us – Front End Developer

Feb 2018 – Sept 2019

Sole front end developer for startup website. Responsible for all front end dev duties, including:

- planning, mocking up and implementing new features
- maintaining and improving current site
- performance and browser testing
- bug fixes
- any other design or development issues that arise
- Work closely with owner and back end developer to determine what new features to add and how to improve site and increase user base and retention.

### Arhaus Furniture – Front End Developer

Jun 2017 – Feb 2018

- Maintained front end on major e-commerce website.
- Developed and implemented new UI as requested by design and marketing teams.
- Suggested and championed UI improvements to increase usability and customer retention using industry best practices.
- Maintained and improved all CSS (SASS), HTML and Javascript to ensure efficient performance of site

### Aztek – Senior Front End Developer

Apr 2007 – Jun 2017

- Designed, developed and maintained multiple client websites ranging from small static content sites to fully dynamic e-commerce sites with custom CMS back ends
- Developed responsive, mobile-first sites and applications in a .NET environment using MVC Razor, HTML, CSS, Bootstrap, Javascript and jQuery
- Collaborated with .NET development team using Agile methodologies to plan and execute sprints and conduct client demos and retrospectives
- Attended client meetings to determine project requirements, demo works in progress, and elicit feedback
- As Director of Front End, conducted weekly code reviews, mentored other front end developers, developed and maintained code standards, and evaluated new technologies for use in the development cycle
- Conducted prelaunch testing of sites to assure cross-browser and device performance
